

**NEW 6.1  
release with  
over 15 new  
features!**

## **TeraLearn® LCMS** **The Knowledge Utility Company**

### **Brave New World**

At no time in history has the way knowledge is stored, retrieved and delivered changed more quickly. Even the most technically advanced organizations face challenges in distributing, managing and administering new multi-layered knowledge resources.

### **TeraLearn – The Knowledge Utility Company**

TeraLearn provides reliable turnkey intranet and extranet solutions for e-Learning. Our affordable, high performance, easy to scale and publish solutions for delivering and managing e-Learning empower organizations to quickly take advantage of emerging e-Learning opportunities.

TeraLearn is available as a dedicated e-Learning application service provider (ASP). Similar to other application service providers you might use (like banks for processing credit card transactions), our service makes providing e-Learning low-cost, low-risk and low-maintenance.

### **TeraLearn LCMS (Learning Content Management Solution) 6.1 Release**

The TeraLearn LCMS is designed to provide organizations with a fast, simple and affordable technology to facilitate learning. TeraLearn is designed to work with PC XP OS or Mac OS 10.4 or higher running IE 6.0, FireFox 2.0 or Safari 3.0.4 or

higher web browsers. Specific features provided by the TeraLearn LCMS include:

- *Web-Based Training:* TeraLearn will enable your organization to rapidly publish web-based training courses. Courses may include default user controls such as:
  - Jump to Main Menu
  - Bookmark
  - Notes
  - Test
  - Navigation Controls (up, down, next)
  - Progress Indicator
  - Glossary
  - Handbook/Resource Directory
- *Author Courses Using PowerPoint With Testing:* The TeraLearn publishing system allows your training team to design, develop and deploy web-based training using PowerPoint. Authoring tools and difficult to use programming languages are optional but not necessary.
- *Reusable Object Support:* TeraLearn allows for the easy creation, management, and automatic updating of course objects. A new course can be created in 10-minutes or less by selecting objects from the course section library you have built.
- **NEW Standards:** TeraLearn is SCORM 1.2 compatible. TeraLearn has added support for select SCORM 2004 standards. The TeraLearn user interface is Section 508-compliant.

All trademarks are owned by the trademark bearers.

- **NEW Blended Courses and Curriculum:** TeraLearn enables organizations to blend learning resources such as pre-reading, virtual classroom, WBT and mastery test into one packaged experience.
- **NEW E-commerce:** Turn-key online billing solution can be added to course information to allow the TeraLearn LCMS to be fully integrated with PayPal our online transaction partner.
- **Classroom Training:** Use TeraLearn to manage classroom training, schedule events, book facilities, configure and update resources, and create user enrollment lists.
- **Web-External:** TeraLearn enables organizations to integrate, launch and manage external web resources including FTP sites, URLs or PDF files at training resources.
- **Collaboration Facilitation:** Robust Threaded Discussion allows users to facilitate sharing of best practices.
- **Demographics Management:** Organizations are able to assign users to unique groups based on user input.
- **Testing/Assessment:** Provides companies sophisticated test generation and test reporting. Test item types include:
  - Multiple Choice – Single Response
  - Multiple Choice – Multiple Response
  - True and False
  - Fill-in the Blank
  - Drag and Drop
 Administrators can configure tests to include time limits, sections, fixed or randomized question order, pass/fail criteria, color, size, retake, show/print and correct response feedback. Import graphics files to complement your test.
- **On-The Job Training:** Provides organizations with the ability to manage on-the-job training and level 3 evaluations.
- **NEW Calendar View:** New smart search feature allows users to view by calendar, type and date.
- **On-The Job Training:** Provides organizations with the ability to manage on-the-job training and level
- **Reports:** Provides organizations with the ability to run detailed user, product, instructor, management rollup and demographic reports. Reports generated may be printed or downloaded in a comma-delimited format allowing for robust analytics.
- **NEW Messaging:** TeraLearn provides a wide range of message options:
  - Automatic customizable messages based on user action (course signup, upcoming session (2), completion, cancellation, missed, rescheduled, waitlist, manager approval)
  - Group member messages
- **Manager Approval:** Courses can be designated as requiring manager approval for user access. The manager can approve or not approve course participation with automatic notification to the user.
- **Certificate of Completion:** Any course or curriculum can have a customizable course completion certificate printable in PDF format for the user.
- **NEW Customization:** The administrator may customize the text, content order, tabs, color and graphic look/feel of the User Home Page.
- **NEW Performance Support:** Add pre-reading, check-lists and downloadable files to any course.

### Fast, Affordable, Secure, Easy

TeraLearn provides for a fast, affordable, secure and easy to implement solution:

- No server support requirements
- No plug-ins (support for IE, FireFox & Safari)
- Readily available support
- Easy deployment to Mobile devices
- Guaranteed performance
- Single vendor responsibility
- Flexible length commitments
- Centralized SSL security and password protection

...all at an excellent value!
